# WELCOME TO OUR SIMPLE GUIDE TO MEASURING YOUR KITCHEN.

This will help you to bring together the details of the space we need to start designing.

This guide helps you with:

- **Where to start**
- **What information we need**
- **Where to send it to when it's done**

If you do get stuck, then give our Designers a call and they'll be happy to help you.

## STEP 1: GETTING STARTED

**Title:** .....

**Full name(s):** .....

**Email:** .....

**Phone:** .....

**Address:** .....

.....

**Postcode:** .....

**County:** .....

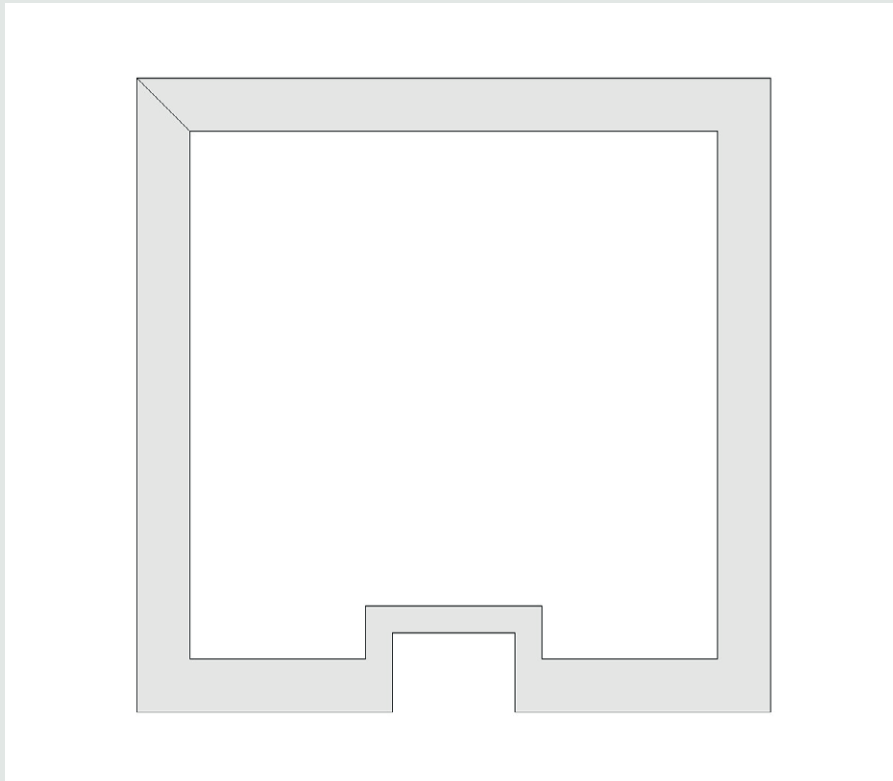

We need your details to send your design and quotation. We will never share them with anyone outside of The Kitchen Store.

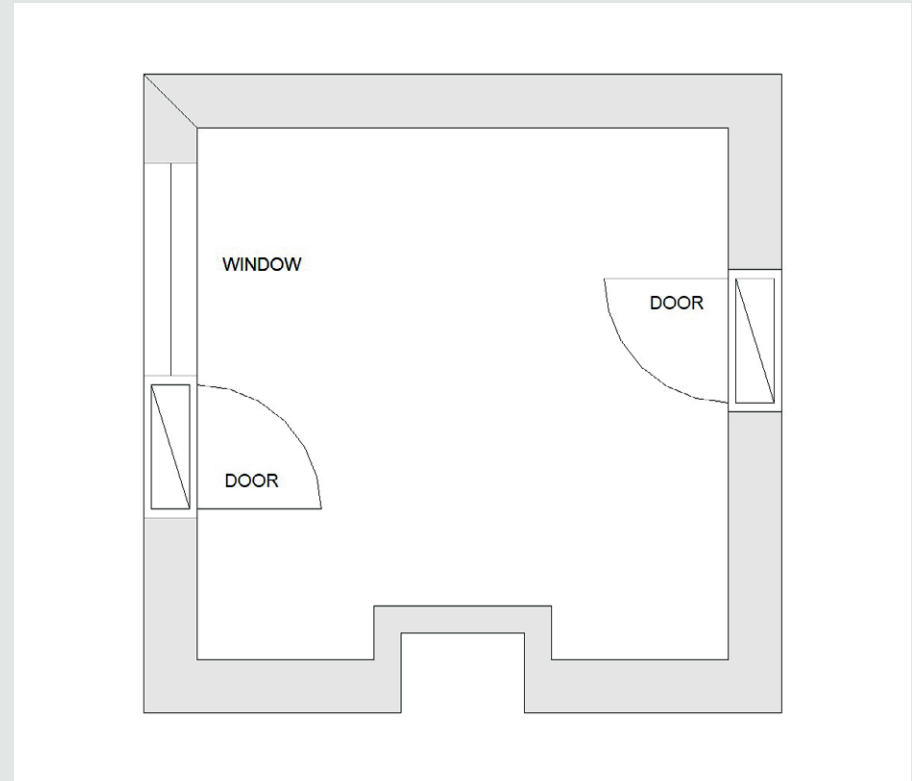

## STEP 2: TAKING MEASUREMENTS

The best way to get an accurate measurement is to think about the room in four simple stages:

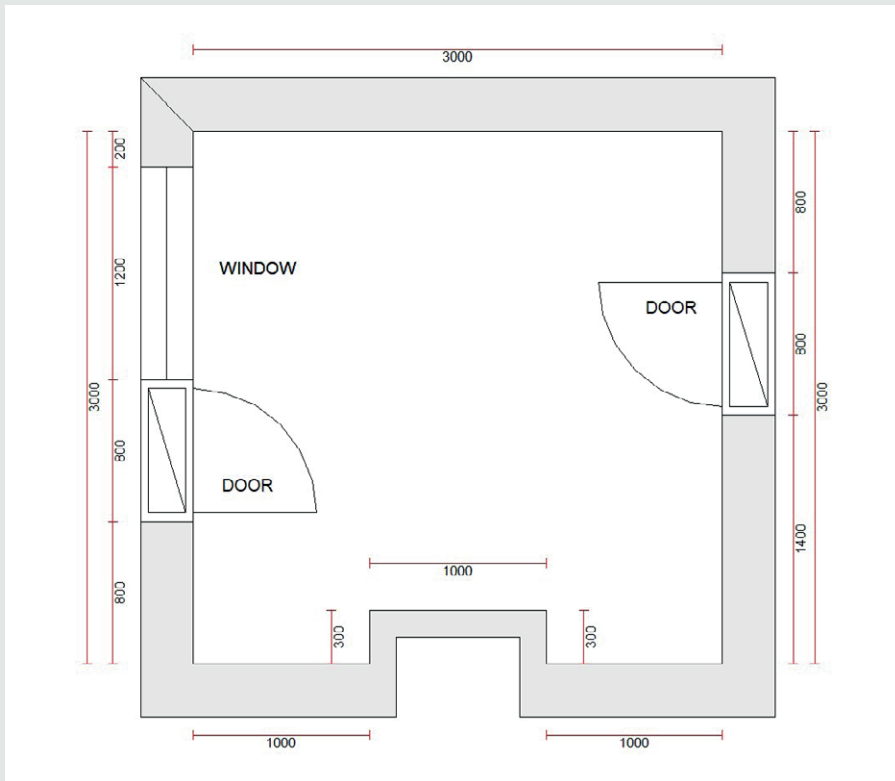

1

Draw the shape of your room (just the walls for now).

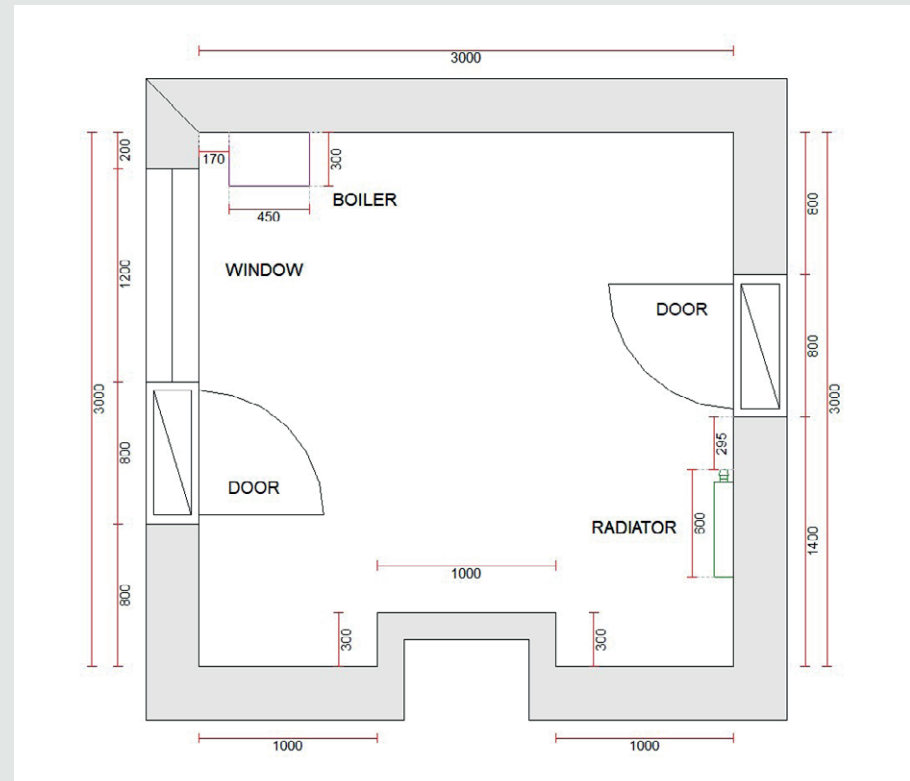

2

Add the windows, doors, hatches or other openings.

3

Add the measurements for all of these features.

4

Add any other permanent fixtures (like your boiler, gas meter, electrical fuse box and stop cock for the water).

## STEP 2: TAKING MEASUREMENTS

Continued...

5

Remember to tell us how high your ceiling is too:

**Ceiling height:** \_\_\_\_\_ mm

6

Just a quick checklist so you know you've remembered everything:

- Walls measured?**
- Doors, windows and openings measured?**
- Boiler, gas meter and electrical fuse boxes added, including their height from the floor and depth where applicable?**
- Ceiling height measured?**

## STEP 3: ANY OTHER USEFUL INFORMATION ABOUT THE ROOM

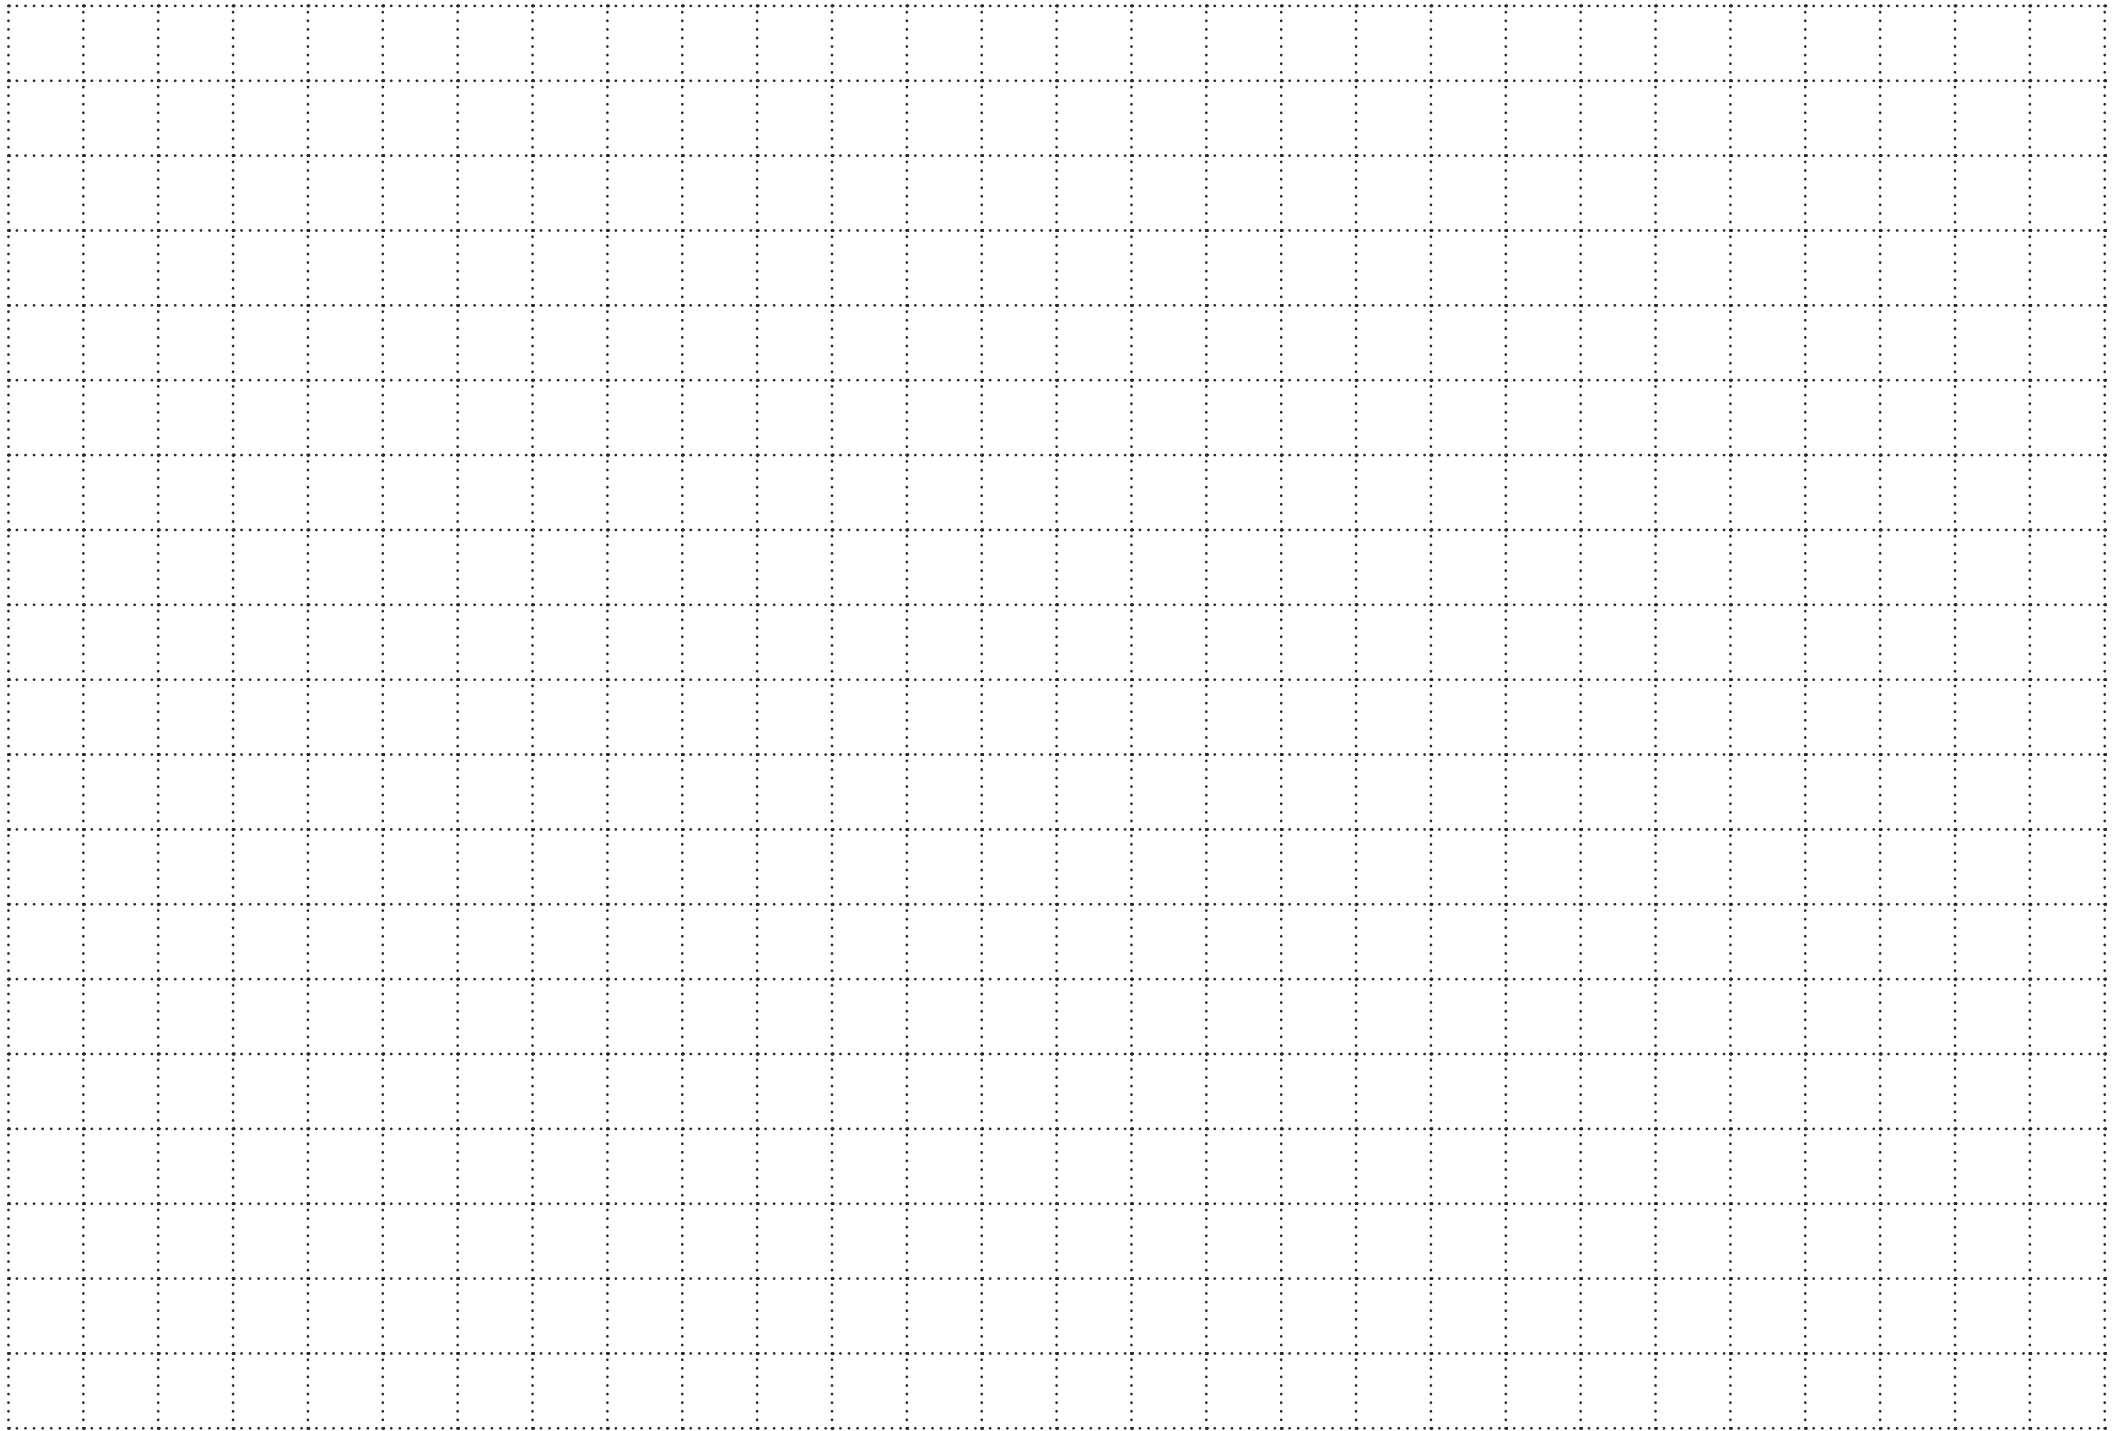

It's always helpful for us to see your kitchen so we can understand the space you have available and if you can send us some photos with this form that would be great (but not essential!)

If there's something about your room that you think will make it easier for us to understand your space, make a note of it here.

## STEP 4: OVER TO US TO CARRY OUT THE DESIGN

We'll check carefully and your designer will contact you to complete a Design Brief. This will give them all the information they need to start working on your design.
